HIGH-PERFORMANCE UPS GUARANTEES RELIABLE POWER PROTECTION FOR CRITICAL DEVICES

| Online (Double Conversion) UPS Topology	ECO Mode	Colour LCD Panel	Built-in Remote Cloud Card by Ethernet	UPS Parallel Expansion	Remote Management Capability
The online double-conversion UPS with built-in Remote Cloud Card for easy remote monitoring and management

Designed for office and data centre applications, the Online S (Premium) Series adopts double-conversion topology to provide seamless Pure Sine Wave output. The UPS output power factor is 1, which means it is capable of connecting to more critical loads and saving more rack space than conventional UPS systems. The products feature parallel expansion capacity to reach higher capacity and safeguard the systems against power failures through redundancy. The pre-installed detachable Maintenance Bypass PDU (MBP) offers power continuity during maintenance. In addition, Remote Cloud Card is included to make remote monitoring and multi-location management much easier. With a tiltable colour LCD panel, users can monitor key power and battery information at a glance. Furthermore, the battery charging current is adjustable via LCD setting to shorten charging time. The products also provide relay-type dry contact ports to support local management from specific UPS signals.
